Erasmus+ KA2 SoMBeT (Social Media Behaviours of Teenagers) 2020-1-TR01-KA229-093511_5

KAUNAS, LITHUANIA 2021 NOVEMBER 22 – 26

SOCIAL MEDIA BEHAVIOURS OF TEENAGERS – SoMBeT

ABOUT SoMBeT PROJECT

The Project is raising awareness among students at the same age in the field of Social Network Behaviours, Addiction, Usage and Cyberbullying.

In SoMBeT project students improved competences in the field of rights and responsibilities using Digital technologies, critical and analytical thinking skills, awareness of social problems, similarities, and differences between partner countries: Turkey, Slovenia, Italy, Portugal, Latvia.

ABOUT MEETING IN LITHUANIA

The meeting in Lithuania was held by Kaunas Jonas Basanavičius gymnasium from 22nd till 26th of November. The topic of our meeting was **DIGITAL RIGHTS AND RESPONSIBILITIES** in social media.

We did have five very interesting and intensive days in which we have opportunity to know all our partners much better, to know traditions, cultural difference, and similarities of each other in the field of our project topic and much more.

At the end after all our activities we became real big team, we became friends – connected not only by social media but connected by our hearts.

DEBATES

All teams were invited to debates lesson. It was great experience, to know how lessons are held in Lithuania, it was very interesting for students and for teachers also. In class teacher introduced debates rules and importance, shared her experience. The topic of debates was the same as project topic, and it was a task to all project participants after all week to meet on last project day and to have debates together.

ICE BREAKING ACTIVITIES

Everybody knows how it is important to be good team. Ice breaking activities are the activities to know each other and became strong team – these tasks break the ice and put the foundation to our friendship (it was fun and there was no social media yet!)

KAUNAS SIGHTSEEING

Of course, after all day we had interesting sightseeing tour in Kaunas city old town – we had great opportunity to know Kaunas city better.

One of the best days in project was all day activities in Vytautas Magnus university

Project participants spent all day in one of best university in Lithuania – VDU, and had an opportunity to analyze, know better how social media behaviors teenagers. Students answered the questions like- what social media means for you, problems of social media, our rights, and responsibilities. Students created their own social media network and their own project pitch, played Kahoot and much more... It was fun. All activities were organized by the best and modern these days methodologies like - design thinking, LEGO, PITCH and etc.

After intensive day in university, we went to very special museum called Rumšiškės. The Open-Air Museum of Lithuania is one of the largest ethnographic open-air museums in Europe that stretches across the area of 195 ha. The exhibitions at the museum are intended to introduce the ethnographic regions of Lithuania – here we had opportunities to know better life without internet, without any devices, but still life there was interesting for sure – we tried – we danced, we played, we tasted.

Innovative game in Kaunas – YES we do love all innovative things – in this project we learn to use it in different way. This indicative game includes and concentrates teams to reach the goal – to be first team solve all tasks. IT is important to mention, that team members do have virtual adviser support! It was challenging – but worth it – cause in teams there was students mixed from different countries. Experience shows how it is important to communicate to each other, and we do have a lot to learn from each other,

Day in Vilnius Trakai – if you came to Lithuania – Vilnius and Trakai is the cities you must visit – to know Lithuania better. Participants of the project had wonderful sightseeing tour in Vilnius old town, visited Mo museum. Trakai and Trakai castle made big impression for all of us, for guest from abroad and for Lithuanian students too.

After intensive week, last day in school was special because we meet here for our final activities – and the activities was like debates – as we all agreed we on first day. Debates showed our students knowledge about social media impact to teenagers – student know clearly what kind of responsibilities and rights in digital are, they knew what is important and what we need to change – what brings the damage. It was nice to hear what our students “grow up” in this digital field.

Everybody was waiting for comix workshop – especially when this workshop was about future! All week we pay attention to things without social media, time without internet, and suddenly we have a task to model the future. Awesome to try to plan future spaceship, food, flag, community. The task was really challenging, all participants had different experiences, different cultures, but we all together became strong team and created strong future spaceships! This task is about creativity and importance of it, specifically than we are talking about our student’s digital future.

All together on project week we did great job – we became real team, real friends.

Erasmus + gives great opportunity, connect us in the way we couldn’t image.

Ceremony finished and all participants was in tears.
